

A Poetic Resignation

The name is good, the brand is big
But the work I do is that of a pig
The work or the brand; what is my way?
I don't know if I should stay.

To work, they have set their own way
Nobody will care to hear what I say
My will be NULL, they won't change their way
I don't know if I should stay.

The project is in a critical stage
But to do good work, this is the age
This dilemma is killing me day by day
I don't know if I should stay.

The money is good, the place is great
But the development is at a very small rate
Should I go for the work, or wait for pay
I don't know if I should stay!

The managers don't know what they talk
The team doesn't know where they walk
That's a bad situation, what say?
I don't know if I should stay.

I can go to any other place
But what if I get the same disgrace
I can't keep switching day by day

I don't know if I should stay.

The negatives are more, the positives are less

Then, why have this unnecessary mess

No more will I walk their way,

It's all done, I won't stay.

Thanks & Regards

Employee

Manager's Response

What I want to say? (Manager)

The decision is good or decision is bad

Only God knows still I am glad

Keep moving in life that is what I can say

If you feel right go in the same way

May god give you the work, the challenge you want

Anyway there is always a second chance

Chances are there, grab them snatch them

That is what I can say

Keep on jumping companies to get more and more and more....

That will keep you always a fore(Even to me)

From my experience I can tell you

Being in software development is like taking hell out of you

You are frustrated since you have no quality work

And you were frustrated because you had quantity work
It's always like that previous job was better than the current one
And expects the new job will be much better than this one
But what you get is a frustration level up to sun
Then you will again send the resignation like this one
This is all what I want to say

Have you completed all the formalities?
Filled the form and got it signed from department humanities (HR)
Once done you can take all your cash
But don't refer others as they will follow you're a*s.
At last I appreciate your contribution to the company
Even though there was not any...

You will keep a copy of this with you for FYI
Don't feel shy
As I also got it some time back from my old manger say Hi....
That is all what I want to say.

Thanks & Regards

Manager
