

Secretary's Desk,

We are living in a globalized era where, preparing a competitive India for global leadership is a challenge. India is thriving very hard to become one of the ten best performing economies in the world. International competitiveness has become a pre-condition for global leadership.

In India, we have more than 50% of the population belong to the generation below 25 years, whom we can rely on for our economic growth in future years. Education in India has been one of the ways to upward social mobility. Good education has been a stepping stone to a high flying career. Indian professionals are considered among the best in the world and are in great demand. This signifies the inherent strength of the Indian education system. India's higher education system is the third largest in the world after China and United States. There are more than 335 universities as of 2009 offering under graduate and post graduate courses and about 6000 colleges affiliated to these universities. Our DSCMIT, which is affiliated to Bangalore University, is one such institution which thrives to cater towards the needs of the students' community for their overall development and society in general.

Being a part of DSI, I appreciate DSCMIT's initiative to launch this E-Newsletter "SAMPADA" by "YUKTHI HR Club" to showcase various Departmental activities. In my opinion education is the key to human advancement. We must work hard to learn new things and create New Technologies to improve this world.

"If you don't learn something new every day then, you have wasted a day of your life"

May, SAMPADA be used as a platform for our younger generation to share their ideas and build their competencies.

My wishes to DSCMIT for its progress and to "YUKTHI HR Club" for its initiative in this new venture.

Mr.Galiswamy

Secretary, DSI.
